

## Case History

To Whom It May Concern:

My name is Chris Buchek and this is my story:

When I was 14 years of age I was taken by my mother to Pratt diagnostic institute in Boston, Mass. because of an illness the local doctors in my home town of Pittsfield, Mass. could not identify. After extensive testing I was diagnosed with Scleroderma. My mother was told to bring me home, give me cortisone and make me comfortable because I would be dead in 2 years at the most. The trauma this caused my family was unbearable. After 2 days on the drugs the adverse reactions caused my mother to toss them out. She reasoned, after watching Dr. Carlton Fredericks on a T.V. program, popular at the time, that we would be better off building the body nutritionally to fight the disease, and that's what we did. Photographs will be taken and forwarded to validate this affliction.

Some years later I had IV Vitamin C therapy which softened the skin that was so hardened. I am now 46 years of age and lead a fairly normal life helping others to learn how to help themselves by natural means.

About 12 years ago I discovered a lump in my breast. I went to Dr. Dan Clark in Florida who was using natural methods. He guided me in some natural therapies and the lump has not returned. In appreciation for teaching patients with fatal diseases how to survive with herbs instead of drugs, our government abolished his medical license and crushed his reputation.

Another doctor who dealt in alternatives to allopathic medicine is Dr. Bruce Halstead of California, close associate of Dr. Jaques Cousteau. He was honored in France and in the Orient. The way our country honored him was to strip him of his license and ruin him financially as they did Dr. Clark who taught me how to use natural means to build my body so it could fight the cancer.

If the FDA succeeds in abolishing the natural means to control the scleroderma they will also extinguish my life. Thousands like me using nutrients to control fatal disease will simply cease to exist. The same can be said of my husband who has MS. Our tombstones can be produced in mass because they will all say the same: Holocaust victims of the FDA!

Mrs. Christine Buchek

"Whoever has this world's means for supporting life and beholds his brother having need and yet shuts the door of his tender compassions upon him, in what way does the love of God remain in him?"

This spring, 25 years to the day after my mother's death they found a nodule in my right breast, and a surgeon told me "we'll take this out next week." When I declined he hammered at me "this nodule will never go away" and was unsatisfied until he brought me to tears. Then he flounced out of the room.

The nodule is gone now thanks to natural remedies. Cancer is curable. It's time to burn the box cars and **FREE THE PEOPLE.**

Mrs. Betty Martini

## DESTINATION EXTINCTION?

It's 2 PM. Since midnight 850 Americans have forfeited their lives to the scourge of cancer that rages across our land. Before this day ends another 550 will perish. **1,400** each day, **10,000** every week, half a million a Year!

20 Years ago President Nixon declared war on cancer. So now it is right to ask what ground has been gained? What victory has been won? What have an Army of oncologists, a Mountain of machines and medicines and a river of money bought for us? Have they washed away the dread threat of malignancy that shadows America? The experts give the answer: The victory **BELONGS TO CANCER!** Year by Year the numbers climb, there's more than ever before. Your odds of getting it are down to **1 in 3** they say.

But something else has grown, too. It's been said that there are as many people making a living off cancer as are dying of it. And a very good living it is for many doctors of death, and evidence is that their prime motivation is to maintain employment. These cancer Professionals have **hijacked** the health of our nation and they're holding it hostage for **\$80 Billion** a Year. To the hostages, you and your loved ones, they offer but a bitter choice: **Pick your way to die!**

**BUTCHERY** .....It's the old favorite, we call it Surgery  
**BURNING** ..... Very modern, very hi-tech, Radiation Therapy  
**POISONING** .....A specialty of the house, otherwise known as Chemotherapy

My Mother, Eve Geller, picked all of them, and died after two years of horrible agony. It began with a small nodule in her right breast. She died a week after her final surgery, a hysterectomy. At the same time my best friend's mother diagnosed with breast cancer. The doctors said she would die in 6 months unless they operated. Susan Shuman refused surgery and survived **10 Years!**

In 1969 Hardin Jones PhD, a professor of medical Physics and Physiology at the University of California at Berkeley, declared:

For the typical type of cancer, people who refused treatment live an average of 12 years. Those who accepted surgery and other kinds of treatment lived an average of 3 years. I attribute this to the traumatic effects of surgery on the body's natural defense mechanism. The body has a natural kind of defense against every type of cancer.

In 1977, Dr. Jones reported that a woman with breast cancer who had no treatment lived up to four times longer than one who was treated by conventional methods. Dr. Alan Levin, of the University of California, San Francisco, confirmed this in 1987:

**Most cancer patients in this country died of chemotherapy. Chemotherapy does not eliminate breast, colon or lung cancers. This fact has been documented for over a decade. Women with breast cancer are likely to die faster with chemotherapy than without it.**

Then, 6 days ago the October 4 NEWSWEEK brought us up to date:

**Americans of any given age are as likely to die of cancer today as they were in 1971.**

That's when the war on cancer began. So 22 Years, 10 million lives and a TRILLION DOLLARS later the cancer doctors in a state of hypnosis butcher, poison and burn us into early graves; inflicting heinous torture, death and destitution unequalled since Nazi death camps, and what have we learned? Only that their methods don't work!

**So the question is: WILL A CURE FOR CANCER EVER BE FOUND?  
And the answer is: LONG AGO!**

**SOME EXAMPLES:**

Last night I talked to Mr. Robert Bearden, a 62 Year old locksmith who lives in Bremen Georgia. Mr. Bearden was diagnosed with lung cancer in August 1990, by a Gadsden, Alabama oncologist who started radiation therapy, 5 days a week. When the doctor met with the family he began with these words: "As you all know, there's no survival for this type of cancer." \$42,000 and six months later Mr. Bearden was told to arrange his affairs, he had 30-60 days to live.

But his family didn't want to lose him, they insisted he try natural medicine, and contacted an independent researcher who made a clear, tasteless, odorless liquid he called CANCEL. He gave Mr. Bearden a Pint of it in 4 small bottles and wouldn't take money for it because he said the Lord gave us the ingredients, and no one should have to pay for them. He put a few drops under his tongue twice a day and in 4 months the cancer was gone. In March of this year an examination by a new oncologist detected no signs of cancer. So how did the first oncologist react when his patient started to recover. He said: "Sometimes things happen that you just can't explain." Mr. Bearden said this cure could be explained and told the doctor what he had been taking. Whereupon the physician became agitated, Waved his arms like a windmill and shouted "NO! NO! NO!" and left the room. "So did I, permanently" Mr. Bearden told me.

But, you see, CANCEL has 2 bad side effects, and it had to be outlawed in November 1992 by the FDA: CANCEL was free, and CANCEL worked! What about us? We can just die! Do you really expect them to give up all those \$42,000 customers? You'd wave your arms too, if you were going to take such a loss!

**THEY'D RATHER HAVE YOU PAY TO DIE!**

While we're on the subject of lung cancer, consider this report in Kazuhiko Asia's book: ORGANIC GERMANIUM: A MEDICAL GODSEND, Published in Japan:

A 54 year old company employee was diagnosed as having cancer on the lungs ... doctors prescribed a 500 mg daily dosage of the germanium compound. An X-ray Photograph taken five weeks later showed absolutely no trace of cancer. There are at least 20 cases of lung cancer at this point which have followed a similar course to complete recovery.

Germanium is on the FDA hit list! I ask WHY?!

It's a bright autumn day, the German time of Oktoberfest, a season of harvest and holiday when the crop is gathered, the yield is tallied, and profits are counted.

Return with me now 50 Years to a Bavarian October in a little town not far from Munich. Munich, the ancient illustrious center of science, progress and education. Around you the mountain crags crowned with castles give assurance that you and your family are protected and safe.

But Your government has built nearby a city within a city, mysterious and private, fenced and walled, guarded with zeal by the Nazi SS, and to this desolate place go forlorn trains with sealed cars. You've learned the cars are crowded with People, helpless people. And when the morning mists cover the valley mingled with smoke from the camp furnaces, an evil scent, the aroma of death permeates your homeland. You try to ignore it, but you know, you know that no one ever leaves that place, the cars are always empty; for you live in Dachau, destination of the damned, where torture, insanity and death rule as kings. Where medical experimentation is conducted, new toxins and antitoxins tried out, surgical techniques devised, and studies are made of the effects of artificially induced disease, all by experimenting on living human beings! And they all died, everyone died eventually. The bitter trains had one destination only: extinction. Destination extinction!

The Problem of cancer has been solved, many times, but you and I are prisoners. We are in Dachau. God's anger must rise up in his nostrils as he beholds entrenched financial empires filled with greed systematically denying lifesaving remedies so that millions die in horrible agony. Its genocide! We read at 1 John 3:17:
