

Dear Bill,

April 17, 1991

Hello! I just wanted to send this to you. I regard you with highest respect for your continuous effort in alerting the public about the New World Order.

Also I still think you are the most important personality to come out of the woodworks. I have deeply been influenced by your tremendous zeal and have always supported your viewpoints in many ways and continue to do so despite the attempt by the so-called UFO community to ostracize you.

I would definitely like to talk to you sometime and if ever I should be in Arizona I would certainly like to visit you.

Norio Hayakawa will be one of 35 speakers scheduled to speak at the First UFO EXPO WEST which will be held on Saturday and Sunday, May 11 and 12 at Hyatt Regency Hotel at L.A. Airport. Mr. Hayakawa will be speaking on the topic "UFOs, The Grand Deception and the coming New World Order".

Norio Hayakawa, who has researched extensively on this topic for many years, had a unique opportunity to accompany an eight-member crew of Nippon Television Network in February of 1990 to the outer perimeters of a top-secret military-scientific installation in Nevada known as Area 51. He and his crew successfully documented a test flight of highly advanced, unconventional "crafts" that the U.S. Government seems to possess in utmost secrecy. According to Hayakawa, the test flights are still ongoing at Area 51 under the code name of "Project Redlight" and are covertly being funded by the so-called "black projects" program, a major part of which is being managed by the Office of Naval Intelligence.

He was instrumental in the subsequent production of a two-hour documentary program televised in Japan on March 24, 1990. The entire program dealt with Area 51 and also the crew's pursuit of an alleged biogenetics laboratory in northern New Mexico.

In his lecture, Hayakawa presents a fascinating insight into a conditioning process taking place currently in the world today, which will be a basis for an incredible event to take place, he contends, sometime in the fall of 1995. It is his belief that UFOs are linked to a sinister "occultic" force (in collaboration with a de facto secret world government) that is preparing to ingeniously "stage" an extraterrestrial contact-landing in order to bring about the New World Order. The amazing thing, according to Hayakawa, is that the real guiding force behind this "staged" event **may indeed** be what could only be described as highly intelligent but deceptive "ultradimensional entities" conveniently materializing in disguise as extraterrestrial "aliens".

Furthermore, he contends that the "Grand Deception" which will be orchestrated in 1995 will occur concurrently with a rapid series of shocking, incredible events in succession, beginning with a Soviet-led Arab Confederacy's attempt to invade Israel, unprecedented worldwide earthquakes and a sudden, mysterious "evacuation" of a segment of the population, all of which will culminate in a quick official formation of a New World Order that will last for seven years upon its inception.

Hayakawa also explains that the shocking series of events will, needless to say, put millions and millions of people worldwide in absolute stupor for months during which time a special, ingeniously executed, extremely effective, multi-leveled "mind control" program will be activated to calm down the stunned populace.

The most difficult challenge that will be faced by the leadership in control of the New World Order which will be initiated at that time will be how best to explain away this shocking, unprecedented concurrences of events, particularly, the unexplained disappearances of a segment of the population worldwide. Hayakawa states that at that juncture, a dynamic, charismatic leader will appear live in a worldwide television network news conference and will offer a brilliant explanation to sedate the public. Somehow the public will accept his ingenious explanation, at which point he will simultaneously announce that he will assume the leadership of the New World Order.

An effective mind-control system is no longer merely a talk by some psychologists or parapsychologists. It has some very significant military applications as well.

Government-sponsored genetics researchers and bio-technology experts at Los Alamos National Laboratory (as well as at other similar biogenetics laboratories allegedly located in northern New Mexico) have been working relentlessly for more than forty years, under the protective umbrella of U.S. Naval Intelligence, to perfect a system that will doubtlessly be a part of this scenario. ELF (extremely low frequency) Wave-Emitting devices, scalar devices and electromagnetic beam weapons are just examples of the many new types of mind-control weaponry that the government seems to have developed in the past two decades. Newest researches on special types of hallucinatory and memory-tampering drugs are part of a growing 'arsenal' that the U.S. Naval Intelligence boasts to have developed in its Parapsychology-Mind Control Unit. Hayakawa also contends that a micro-chip implantation technique is being perfected in which tiny micro-chips could be implanted in our circulatory systems, vital organs and tissues if need be for whatever purpose the future may require. He also daringly contends that a large-scale research has been completed by the government within the last 20 years or so utilizing tens of thousands of cattle in the Southwest to conduct this covert experiment. Only recently has science proven that cow hemoglobin could be substituted (by utilizing a special purification system) with human blood in situations such as in unforeseen national emergencies.

According to Hayakawa, the countdown for this stunning event of 1995 began in 1948. He is convinced that we are living in the seven-year "warning" period which began in 1988 when Israel celebrated its 40th anniversary of statehood. He explains that there will yet be two more major conflicts in the Middle East, involving Israel. The reason for the rapid conclusion to the Persian Gulf "War" was none other than to expedite the conditions for a temporary Arab-Israeli peace treaty which will be signed shortly. Hayakawa does not consider the Iraqi invasion of Kuwait and the subsequent Persian Gulf "War" to have been a Middle East War simply because Israel was not involved militarily. There have been only four Middle East Wars so far in which Israel was involved militarily. Those took place only in 1948, 1956, 1967 and 1973. The next Middle East War involving Israel will be in the fall of 1995, as he mentions, and possibly around the time of the celebration of the Jewish Feast of the "Trumpets". (He states that it is no coincidence that heretofore four major "waves" of UFO sighting reports worldwide took place within the general proximity of each of those specific years. The next major "wave" is due just prior to 1995.) A few years prior to that, there will be a pseudo Middle East Peace Conference in which a temporary treaty will be signed.

As far as the UFO phenomenon is concerned, Hayakawa admits that his understanding of it may not be widely acceptable to the general public, particularly to those who strongly hold on to the so-called Extraterrestrial Hypothesis. For many years he himself had been an adamant believer in the E.T. Hypothesis, i.e., the belief in the presence of alien intelligence conducting a global reconnaissance mission of some kind.

Since around 1973 he says he drastically reversed his position and no longer supports the hypothesis that UFOs are in essence intelligently controlled crafts from beyond our solar system conducting a thorough surveillance of our planet and its inhabitants as a preliminary step towards a future open contact, a popular concept evidently held by the majority of those that believe in UFOs and in alien visitations, and a concept that is apparently been promoted by a "sinister" occultic force, he claims, present in the world at this time.

Despite the often disdainful attitude the topic is regarded with among the so-called scientific community at large, the common public's fascination with and acceptance of UFOs as a topic well deserving of more serious study has steadily been on the rise especially within these last two decades or so. More people now than ever before seem to be accepting the notion that we may not be alone in this vast universe--that since there are billions of sun-like stars that could support planetary systems, there must consequently be a proportionate number of life-supporting planets out there with a possibility of existence of many advanced civilizations or civilizations in various stages of development.

He believes that this very "belief system" is precisely what that sinister force is attempting to create in the minds of many, particularly through the growing New Age Movement, a deceptive pseudo-religious movement that promotes an exclusive belief system in the "cosmic" or "universal" consciousness (together with occultic communications with extraterrestrial "avatars") and replacing the traditional Judaeo-Christian concept of a personal God. Such a belief system facilitates the acceptance of UFOs as possible interplanetary vehicles from yonder primarily conducting a reconnaissance mission and secondarily revealing themselves to a "select few" to warn us of the imminent dangers of continued nuclear armament and ecological destruction, a rather "reasonable" hypothesis since UFOs seem to have openly commenced the manifestation of their presence soon after the first explosions of the atomic bombs.

This type of thinking seems to be further accelerated by a dramatic increase recently in the so-called UFO "contacts" allegedly claimed by hundreds, perhaps even thousands, of people across the globe, including those that even claim to have been abducted by UFOs and released after having been "genetically experimented" on by the entities inside the crafts.

Yet Hayakawa also claims that some of the top UFO researchers highly respected in the world today, such as Dr. Jacques Vallee and John A. Keel, seem to be abandoning the E.T. Hypothesis due to the insurmountable challenges and questions posed by the increasing inconsistencies, contradictions and the so-called "behavioral patterns" observed in many of the alleged "activities" of these objects and their often reported "occupants" or "entities".

More than 40 years of worldwide UFO sightings have produced not a single hard, tangible evidence so far that seems to support the E.T. visitation hypothesis. Yet sightings continue to be reported unabated worldwide and "abduction cases" seem to be increasing.

It is Hayakawa's belief that this is precisely one of the main reasons why the perplexed governmental agencies of both the United States and the Soviet Union have not officially announced the existence of UFOs or the alleged "UFO-nauts", i.e., due to a sudden desperate realization that the entire phenomenon is an astounding combination of the seemingly physical and a yet unknown "ultra-dimensional" phenomenon crossing into what could only be termed as a psychic, occultic or even an "ethereal" domain, the penetration into which seems to be impossible by mere conventional science as we know it today.

Yet there seems to be some changes in the policies. A gradual propagation of "alien presence" by the government may be in the works already. The New World Order will no doubt capitalize on such a manipulated belief system in order to proceed with their plans.

Hayakawa is in touch with top UFO researchers in Japan and continues to exchange intelligence information obtained from various U.S. sources and elsewhere with researchers of similar vein in both countries. He also states that a major Japanese TV Network will conduct a thorough investigation and documentation this summer of the expected appearances of hundreds of so-called mysterious crop circles in England. They will coordinate with England's BBC Television and numerous American news media and will spend more than a month over there to get to the bottom of that phenomenon. Hayakawa contends that the mysterious crop circles, increasing in number worldwide and becoming more complex in designs, are without doubt an occultic phenomenon that will never be explained by contemporary physical science.

In his presentation, Hayakawa will also talk about a covert Northrop Corporation facility located in the Antelope Valley area in northwest Lancaster, California (at the foothills of Tehachapi Mountains) where testing of highly advanced crafts, similar to those at Area 51 in Nevada but much smaller in scale of operation, are presently being conducted.

In 1990 he founded the Civilian Intelligence Network based in Los Angeles, California and is presently serving as its director. The Civilian Intelligence Network is a loosely-knit network of intelligence gatherers and analyzers (with correspondents in several states) that evaluate and exchange all pertinent information in order to inform and alert the public that there has been (and still is) a major cover-up going on regarding the existence of a sinister 'government' within the government, as well as a sinister political-religious force that seems to oversee the international banking system, all of which is part and parcel of an emerging New World Order.

Hayakawa explains that under the guise of initially separating the world into three basic economic, political and geophysical sections, those in control will attempt to bring the three into one unit --the New World Order. The first step is to bring about the complete unification of Western Europe, which will be completed on December 31 of 1992. The U.S. and Canada will form one block, and the remaining block will be formed principally by the emerging Far Eastern Economic Bloc, led by Japan (technologically and economically) and China (militarily). The three blocks will eventually be consolidated into one unit to bring about the New World Order.

However, the final big push towards the formation of the New World Order will be expedited by conveniently creating an "external threat" from elsewhere, and this is precisely the topic of Mr. Hayakawa's lecture on which he will expound.
